

Position – Sr. DevOps Engineer

Experience – 6-10 Years

Compensation – Open in best industry

No. of Positions – 1

Location - Gurugram

JD of Senior DevOps Engineer

The Sr. DevOps Engineer works to improve software development and release lifecycle efficiencies by modernizing our processes & workflows and building a robust Continuous Integration/Deployment pipeline. The Sr. DevOps Engineer will provide guidance in organizing, securing, and automating existing product development workflows and must be proficient with agile development processes and best practices.

Responsibilities:

- Manage the configuration of the build infrastructure (Windows and Linux)
- Improve reliability and performance of test and build processes
- Design and maintain automated release channels
- Proactively look for ways to automate the installation and upkeep of build tools and dependencies
- Review and recommend solutions and tools to improve the software development process
- Own the process for releasing builds into QA and up to production
- Managing pre/post release code merges
- Managing the code branching strategies
- Building the bridge between Engineering (dev & QA) and IT Operations

Must Haves:

1. AWS
 - Certification or 2+ years hands on experience
 - Linux systems configuration
 - Networking and infrastructure components like ELB
 - Monitoring and alerts
2. Docker
 - Experience with containers as build artifacts
 - Configuration, provisioning and deployment to production environments
 - Certification or 1+ years hands on
3. Build and Deployment Automation
 - Deep knowledge of Continuous Integration (CI) and Continuous Delivery (CD) methodologies with Jenkins
 - Hands on experience with design and implementation of Continuous Delivery and/or DevOps solutions or architecture patterns.
 - Creating Jenkins pipelines using groovy and which will automate complete deployment process.

- Experience in installing and configuring Jenkins Continuous Integration Server
- Jenkins CI/CD with build pipeline plugin and pipeline as a code
- 5+ years of Devops experience

Nice to Have

- Kubernetes: Container provisioning, orchestration, and clustering
- Gitlab/Github
- Ansible

About Company

www.biocube.ai

Biocube is India's one of the most innovative & promising Artificial Intelligence enabled Biometric Software Platform, Products & Solutions designing organization. We bring a new paradigm in User Identity verification, with redefined Security and User Control. Our vision is to Empower & Enable every Individual to experience the power of AI & Biometrics on their own smartphones & to bring Convenience, Seamless Experience & comprehensive Security in their daily life through biometric authentication based One Tap Digital Transactions.

Biocube has presence across the globe, with its development Centre in Gurgaon, Haryana, India.

We have successfully developed our proprietary Computer Vision, AI & multi model Biometric technology platform for which Biocube has filed patent in USA, which is currently in progress.

Biocube provides one of the industry's unique solutions that has potential to change the dynamics of Biometric Identity verification market. Our continuous search for opportunities in newer markets & industries, help Biocube to keep ahead of the Technology Innovation curve.

Growth potential

Prospective candidate will get opportunity to learn and grow his career in the field of latest technologies. In our growing organization there are ample opportunities to get know-how in multiple domains & functionalities like Banking, Hospitality, Education etc and new-age technologies like Biometrics, Blockchain, Machine Learning, Data Analytics etc. Candidate will get opportunities to grow with the organization in terms of technical expertise as well as personal development. Biocube believes in a great work life balance.
